

AP/IB Physics 2:

Welcome to AP Physics 2. Everyone will need to get a jump start on Unit 1 prior to school starting. You will complete Unit 1 Fluids by following the AP Physics 2 Khan Academy Lessons/Tutorials (www.khanacademy.org/science/ap-physics-2/ap-fluids).

Please login using your SCHOOL account that uses your student ID and then followed by @skstudent.org when it asks for your email. I will track and verify your Khan Academy progress on my end and it makes it much easier if you use your school account.

This unit normally takes class 7-8 class periods, which is about 14-16 hours, so make sure to pace yourself over the next four weeks, prior to the start of- school. I'm excited to join this adventure with you! I have a lot of new things I'll be introducing this year that will make it easier, and more fun, to learn no matter if we are face-to-face or online.

Please email me at zawlocki@skschools.org so I can add you to our Google Classroom. See you soon and Go Wolves!
